Current Issues in Postdoctoral Training

Christopher Grote, Ph.D.
Rush University Medical Center
APPCN President
BOD Member: APPCN, ABCN
This meeting is in response from a request from the Clinical Neuropsychology Synarchy (CNS) that APPCN and AACN have a meeting regarding issues in postdoctoral training, including recruitment of postdoctoral applicants.
History and Objectives

• As President of APPCN, Grote consulted with colleagues in and out of “match” programs as to when and where such a meeting should be held (stand alone vs day before or after a conference vs occurring within a conference)

• Extensive discussion about topics and goals
History and Objectives

• Many diverse opinions expressed
• An agenda was reached and agreed upon with BOD of APPCN to include three topics today (diversity, competency, recruitment of applicants)
• AACN generously provided space but was not part of programming decisions
Objectives

• A review of what is important to learn regarding these three topics
• A chance to exchange views, and ideas how to move forward, what might be done next
• NOT a session to make decisions or reach policy
• Collegial and informative
• Nothing here necessarily represents the views of APPCN, AACN or any other organization
THANK YOU!!
