The following listing represents scholarly publications and additional resources related to the clinical neuropsychology subspecialty practice of Forensic Neuropsychology (FN). Items listed below were identified by consensus of the Forensic Neuropsychology Special Interest Group (FNSIG) core work group (Boone, Denney, Hebben, Marcopulos, Morgan, Nelson, Sweet, Westerveld). These selections are considered to either have historic importance in the development of FN or to contain information pertinent to current FN practice. Notably, because of the enormous size of the relevant literature, this listing is not comprehensive, and will be updated at intervals, as deemed appropriate.
